- Any attempts to modify, decrypt or rename the files will lead to its fatal corruption. It doesn't matter, who are trying to do this,
either it will be your IT guys or a recovery agency.

Please follow these simple rules to avoid data corruption:

- Do not modify, rename or delete files. Any attempts to modify, decrypt or rename the files will lead to its fatal corruption.

- Do not hire a recovery company. They can't decrypt without the key.
They also don't care about your business. They believe that they are
good negotiators, but it is not. They usually fail. So speak for yourself.

Waiting you in a chat.
